Subject: Requests for Scientific Literature
[Wild Rice Advisory Committee Letter.pdf](#)

Hello all:

I wanted to get back to you about requests for copies of the scientific literature (some of which is copyrighted) that the MPCA has collected as part of the wild rice sulfate standard study. The attached memo describes how we will address this request for members of the Advisory Committee whose work is an extension of the MPCA's work.

For interested parties who are not on the Advisory Committee, the MPCA is obligated under Minnesota's Data Practices Act to produce data it possesses for review and inspection by those who request it. The MPCA cannot copy or distribute copyrighted material to organizations or

individuals who are not direct participants in the MPCA's fair use of the copyrighted data without violating the Federal Copyright Act.

Under the Data Practices Act, we will provide access to all of the material to anyone who wants to come to the MPCA office to view it. Requesters must make their own copies of copyrighted materials if they want them. The MPCA will provide copies of non-copyrighted materials and may charge for them as it would for any data practices request.

Members of the Advisory Committee can request copies of the MPCA's current Wild Rice Study literature holdings by responding to this e-mail or calling me at 651-757-2340. Advisory Committee members, please review the information in the attached memo so you understand the conditions for the use and return of copyrighted materials.

Thanks,

Pat
